

Cosmos Philosophy

By Jeremy Tiefenbrun

**1) The Way of Simple
Cosmos is simple**

Searching for simplicity is a quest of life. To find a simple life takes time and must be cultivated. The art of simplicity is expanded upon in the Principles of the Cosmos Philosophy.

**2) Life as Program
Using organization apps
Mind maps in a journal or sketchbook**

**3) Organizational structures
Force-command organize
Use binders and schedule
Use alerts for time
Force command is instructing your intelligence or mind to do something now in a command.**

4) Be

5) Stay in the present moment.

6) Cosmos is nature

7) The Study of Logic

Logic is the practical application of supporting arguments with logical conclusions backed up by scientific evidence. The control of human emotion in logic is a secondary point, and this emotional regulation is governed by a cosmic view of life. Vulcan logic is based on Star Trek, by Gene Roddenberry.

to Defend the Cosmos

Understand that money and religion as organized structures must leave government. They need to get out of the modern system and get out of it in history to mature as a human race. Life benefits in a free system non money related must be in place in an ordered civilization. Cosmos is a mature humanity. Be with science; science is the key to an evolving humanity. Defend the Cosmos and look at the arguers; be a mature example of power and authority. Religions need to know they are ok. This is one of their tactics. Truth is, Religion is not always agreed by all. It is but just a human concept made by humans.

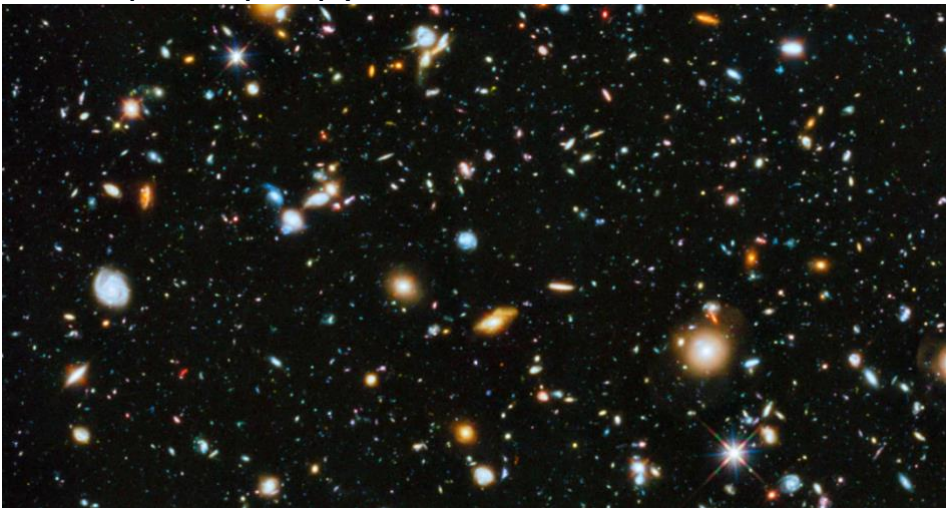

Be ready to say you are ok as a female in the Cosmos philosophy.

**Go with the flow
Be guided by the flow of Cosmos.
It's intuitive and serves as the voice inside you!**

**Fortress Blue Kaptal-
the symbol of Cosmos!**

Galaxies are a vehicle for all life. Cosmos is cosmos. Life is life. Cosmos is a vehicle for all life. Go with the flow. Cosmos is still there at night.
